**20a. How does the Committee accomplish its purpose?**

Section 492 of the PHS Act states that The Secretary...shall by regulation require appropriate technical and scientific peer review of -- (A) applications...; and (B)... biomedical and behavioral research and development contracts.... This committee is composed entirely of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant applications in the fields of allergy, clinical immunology, immunopathology, immunobiology, immunogenetics, immunochemistry, and transplantation biology. During this reporting period the committee reviewed 113 grant applications requesting \$106,136,495 in direct costs.

**20b. How does the Committee balance its membership?**

The members of this committee are authorities knowledgeable in the fields of allergy, clinical immunology, immunobiology, immunopathology, immunochemistry, immunogenetics and transplantation biology.

**20c. How frequent and relevant are the Committee Meetings?**

The committee held three meetings during this reporting period, 10/19-20/2017; 2/15-16/2018 and 6/28-29/2018.

**20d. Why can't the advice or information this committee provides be obtained elsewhere?**

This committee is composed entirely of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge. Their recommendations cannot be obtained from other sources because the complex nature of research and of research program emphasis and management requires a specialized balance and breadth of expertise not available on the NIH staff or from other established sources.

**20e. Why is it necessary to close and/or partially closed committee meetings?**

The meetings of the committee were closed to the public for the review of grant applications. Sections 552b(c)(4) and 552b(c)(6) of the Government in the Sunshine Act permits the closing of meetings where discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information, the

disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

## 21. Remarks

URL: This committee does not have a website. Reports: This committee did not produce any public reports during the fiscal year. Due to the large number of members associated with this committee, NIH staff are unable to provide individual zip codes for all members. Current individual meeting rosters, including zip codes are available on line at <https://public.era.nih.gov/pubroster/>. Past individual meeting rosters are available by contacting the DFO.

## Narrative Description

The goal of NIH research is to acquire new knowledge to help prevent, detect, diagnose, and treat disease and disability, from the rarest genetic disorder to the common cold. The NIH mission is to uncover new knowledge that will lead to better health for everyone. NIH works toward the mission by supporting the research of non-Federal scientists in universities, medical schools, hospitals, and research institutions throughout the country and abroad. Section 492 of the PHS Act states that “The Secretary . . . shall by regulation require appropriate technical and scientific peer review of – (A) applications . . . ; and (B) biomedical and behavioral research and development contracts . . . .”

**Action Comments**

An action of "approved" or "recommended" for grants receiving initial peer review by this committee does not infer that the grant will be or has been funded. Research grant applications submitted to NIH must go through a two-step review process that includes the initial peer review for scientific and technical merit and a second step of review and approval by a National Advisory Council for program relevance. In addition, prior to an award or funding being made, NIH staff must conduct an administrative review for a

number of other considerations. These include alignment with NIH's funding principles, review of the project budget, assessment of the applicant's management systems, determination of applicant eligibility, and compliance with public policy requirements. After all these steps have been completed, NIH officials make funding decisions on individual grant applications.
